Krya

Fortify Your
Digital Defenses

Comprehensive cybersecurity solutions to safeguard your business from evolving threats.

In today's rapidly evolving digital landscape, safeguarding your organization's assets and data is more critical than ever. At Krya Solutions, our Cybersecurity Services provide end-to-end protection against evolving cyber threats, ensuring your operations remain secure and uninterrupted.

With deep expertise in risk assessment, incident response, and proactive threat defense, we equip businesses with the tools and strategies needed to maintain resilience and thrive in a dynamic threat landscape.

Krya

Advanced security services and solutions from Krya

Risk Assessment - External
Gain a clear view of your external security posture with insights to strengthen defenses.

Security Consulting and Architecture
Holistic review of your digital infrastructure to detect vulnerabilities, address gaps, and provide guidance for strategic security enhancements.

Virtual CISO
Expert security leadership for small and medium businesses without in-house expertise.

IT Security Audit
Analyse and fortify your IT framework for enhanced protection and compliance.

Next-Gen Vulnerability Scanning and Testing – VAPT
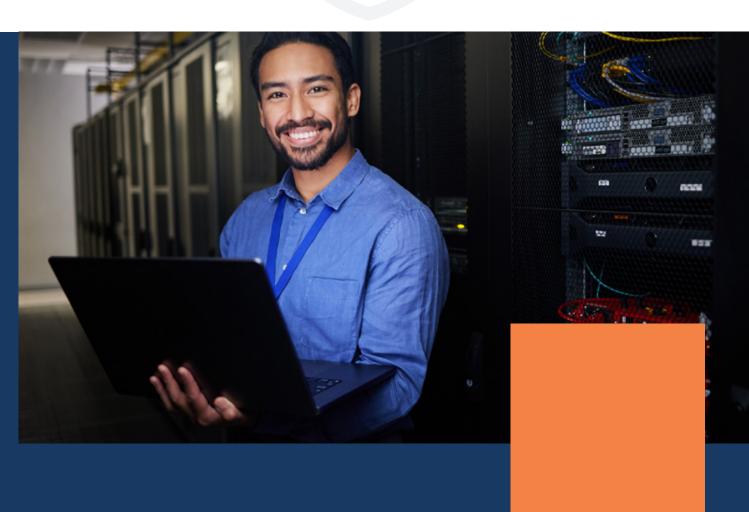

Web Applications
Detect and remediate vulnerabilities in your websites and web applications.

Network
Assess and improve the security of firewalls, servers, and network devices.

Mobile Applications
Secure your mobile apps by identifying and addressing potential gaps.

Enterprise security enhancement with Cutting-Edge Threat Detection and Response

Firewalls
Control and monitor incoming/outgoing network traffic based on security rules.

Intrusion Detection/Prevention Systems (IDS/IPS)
Detect and block malicious network activity or policy violations.

Endpoint Protection Platforms (EPP)
Secure endpoints like laptops and mobile devices against malware, ransomware, and exploits.

Antivirus and Anti-Malware
Identify and remove malicious software on devices.

Web Application Firewalls (WAF)
Protect web applications from attacks like SQL injection and cross-site scripting.

Email Security Gateways
Filter phishing, spam, and malicious attachments in emails.

Secure Web Gateways (SWG)
Control and protect web traffic to prevent access to harmful websites and content.

Sandboxing Solutions
Isolate suspicious files or code in a secure environment to analyze behaviour before allowing access.

Threat Intelligence Platforms
Aggregate and analyze threat data to anticipate and block emerging threats.

Security Information and Event Management (SIEM) with SOAR
Collect and analyze security data, automate responses to prevent threats.

Data Loss Prevention (DLP)
Prevent sensitive data leaks by monitoring and controlling data transfers.

Strategic Cyber Threat Response Planning
Empower your organization with a resilient framework to detect, contain, and eradicate security incidents swiftly.

Protect what matters – your **data**, **infrastructure**, and **operations** – from business-disrupting threats.

Collaborate with Krya Solutions to build a customized, comprehensive cybersecurity solution.
